

i-Net Solution is a India based Software company started in the year 2004, offering complete range of Website development which includes Website Design, web hosting, Internet marketing, Search Engine Optimization and e-commerce solutions. With so many companies competing for the same business it can be hard to stay ahead of the competition at the present market. We are proud to say still we are ahead of our competitors with our best service and unique design.

We excel in our projects based on our 3 key concepts

- **Ideas.** Nothing is so worthy in the virtual world as ideas. When the ides get ripe we get a better understanding and that leads to an excellent output. We never let ideas escape from our creative thinkers and designers;
- **Implementation.** When the ideas are taken in a right path with a combination of dedicated developers, we are at the next step of our success.
- **Delivery & Service.** Customer satisfaction and the service are the final and the important step of a business. We have quality team and testing team to help our customers to interact and to fulfill their needs always at the right time. We never let down our customer's ideas and expectations. i-Net solution provides a high-end customer satisfaction with its quality and service.

- Doctor Appointment Management
- Online Product Management
- Online Medical Store
- Community Web Portal

Open Source Technology

We have more knowledge in open source **JOOMLA, DRUPAL, WORDPRESS, OSCOMMERSE, PHPBB** and etc.

Content Management System – Joomla, Drupal and Wordpress

Joomla is a content management system (CMS), which enables you to build Web sites and powerful online applications. Many aspects, including its ease-of-use and extensibility, have made Joomla the most popular Web site software available. A content management system is software that keeps track of every piece of content on your Web site, much like your local public library keeps track of books and stores them. Content can be simple text, photos, music, video, documents, or just about anything you can think of. A major advantage of using a CMS is that it requires almost no technical skill or knowledge to manage. Since the CMS manages all your content, you don't have to.

We have knowledge with Joomla in three parts. **Joomla Templates Development, Joomla Modules Development, Joomla Components Development.**
